Unispice working to comply with all programs

By UniSpice

The entire Unispice team is working to continue the programs and mitigate, as much as possible, any negative impact. From every level at Unispice, from farms, packaging and production facilities, logistics, and Human Resources, we are all working jointly to adapt to every change and reduce the possibility of interruption of supply; nevertheless, we should all be aware that there is a possibility of interruptions. We ask you to please be as flexible as possible, and have continuous communication with our team, so together we can adapt and serve our customers.

The Guatemalan government has ordered a curfew, so surely there will be changes in general operations. We are working to have a fulfillment rate as high as possible.

Such changes can have an impact on shipment schedules, routes, and others. We will be flexible in order to comply with our commitment of always growing and to challenge the impossible. We will keep you constantly informed.

Guatemala in Action

The Guatemalan government has taken definitive actions to stop the spread of the virus. Today, the government has ordered a curfew for all industries from 4 p.m. to 4 a.m. of the following day.

Some guaranties have been limited in order to contribute to this goal, some are: public transport, quarantined villages, suspension of operations of non-key industries, among others.

Health and social care centers have been strengthen, four emergency hospitals are being built to give medical assistance to Guatemalans who require it.

MEASURES ENHANCED

Constant training on prevention measures to all personnel

Health checkpoints at all facilities, periodically

Cleaning and disinfection of all areas, periodically

Extreme hygiene measures have been taken at farms, packing plant and office.

Separation of employees and implementation home office

Private transportation for employees

Social distancing to reduce contact and use of mask for risk personnel

Alternative routes and dispatch flexibility to comply with all programs

Constant update to all stakeholders
